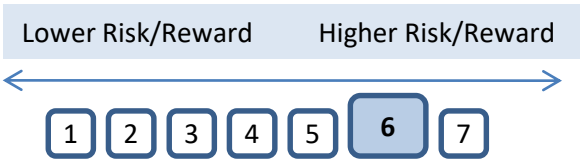
Risk and Reward Profile



What do these numbers mean? They rate how the Fund may perform and the risk of losing part of your capital. Generally the potential for higher gains also mean a larger risk of losses. The lowest category does not mean a risk free investment.

Historical data, such as ones used for calculating this indicator, may not be a reliable indication of the future risk profile of this Fund.

The risk and reward category for this Fund is not guaranteed to remain unchanged, and may shift over time.
For additional details on risks, please refer to the prospectus.

Why is this Fund in category 6? The Fund is classified in the specific category because its share price may fluctuate significantly comparative to lower categories classifications. Therefore, the likelihood of bigger losses or gains is comparatively high.

The Risk / Reward profile is a reasonably accurate reflection of the risk inherent in the Fund under past market & operational conditions.

As regards potential future extraordinary events different from those occurred in the past history of the Fund, these are not captured by the Risk / Reward profile;
other risks not captured by it include -the risk due to operational failure, i.e. human error or failure in systems and processes, -the risk due to unforeseeable unusually big orders by clients to exit the Fund, which may result in worse than expected entry/exit price levels, -in cases that the Fund invests in derivatives, mainly the risk of failure of derivative counterparties to fulfill their obligations, -the risk carried by the fact that emerging countries' capital markets are smaller, less liquid and more volatile than developed countries' capital markets.
