

KEY INVESTOR INFORMATION

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

(LF) Special Purpose – Blue Chips Protect fund, a sub-fund of (LF) Fund

Eurobank Class, ISIN: LU0330258152, Currency: EUR

This Fund is managed by Eurobank Fund Management Company (Luxembourg) S.A., part of the Eurobank Group

Objectives and Investment Policy

(LF) Special Purpose Blue Chips Protect Fund is a fund that aims to provide investors with capital growth.

In order to achieve the Fund's objectives: 1) a portfolio of bank deposits, money market instruments, debt securities, mortgage-backed securities and asset-backed securities is chosen at discretion of the portfolio manager; the Fund may not invest more than 20% of its assets in mortgage-backed securities and asset-backed securities; the Fund may invest more than 35% of its assets in Greek Government bonds, but such investments cannot exceed 50% of the total net asset of the Fund, 2) a Derivative Investment Strategy is put into action through financial derivative contracts. The current Investment Period of the Fund started on January 14th, 2013 and ends on January 8th, 2018. The Board of Directors of the Fund will decide before the end of the Investment Period, whether the Fund will be liquidated, prolonged for a new term or contributed to another fund. Unitholders will be informed accordingly in due course.

The Derivative Investment Strategy is linked to the return of EuroStoxx 50 equity index (hereafter referred to as Index) during the Investment Period. The Derivative Investment Strategy return is linked to the Index return, as follows: (a) if at the end of the Investment Period the level of the Index is equal to or above of its level at the start of the Investment Period and below 120% of its level at the start of the Investment period, then the Derivative's Investment Strategy gain is 18%; (b) otherwise, if at the end of the Investment Period the level of the Index is equal to or above 120% of its level at the start of the Investment Period, then the Derivative's Investment Strategy gain is 20%; (c) otherwise, if at the end of the Investment Period the level of the Index is below of its level at the start of the Investment Period, then the Derivative Investment Strategy does not result in capital gains or losses. The Derivative's Investment Strategy return is effective for subscriptions made on or before January 14th, 2013.

The Fund's overall return is linked to the portfolio return and the Derivative Investment Strategy return, as described above.

You can buy or sell shares of the Fund on a daily basis (bank business days in Luxembourg and Greece). All income of the Fund is reinvested.

Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money before the end of the Investment Period.

For full investment objectives and policy details please refer to the prospectus.

Illustrative Examples

The following scenarios are examples and are purely indicative, in order to illustrate the formula's mechanism under different market conditions. They reflect the output of the Fund at maturity only. They do not represent a forecast of what might happen and may not have an equal probability of occurrence. They do not account for risks described in the "Risk and Reward Profile" section, which may lead to higher level of loss for the investor.

Unfavourable conditions

Underlying performance	UCITS performance at maturity	Equivalent annual growth rate
-50.0%	0.00%	0.00%

At the end of the Investment Period the Underlying Index performance is negative (-50%), so the Derivative Investment Strategy return is 0%. That is the “floor” that protects the investor from underperformance of Index. This corresponds to 0% annual growth.

Favourable conditions

Underlying performance	UCITS performance at maturity	Equivalent annual growth rate
+50.00%	+20.00%	+3.72%

At the end of the Investment Period the Underlying Index performance is 50%, so the Derivative Investment Strategy return is 20%. The investor does not take advantage of the full performance of the Index, but gains the maximum return of the Derivative Investment Strategy. This corresponds to 3.72% annual growth.

Medium conditions

Underlying performance	UCITS performance at maturity	Equivalent annual growth rate
+17.00%	+18.00%	+3.37%

At the end of the Investment Period the Underlying Index performance is 17%, so the Derivative Investment Strategy return is 18%. The investor gains more than the performance of the Index. This corresponds to 3.37% annual growth.

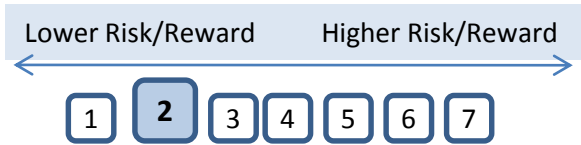

Very unfavourable conditions

Underlying performance	UCITS performance at maturity	Equivalent annual growth rate
-50.00%	-25.00%	-5.59%

Investment Period the portfolio return is negative, due to the scenario of hypothetical losses from certain issuers in the portfolio (as described in the "Risk and Reward Profile" section). The total result for the UCITS performance is -25%. This corresponds to -5.59% negative annual growth.

If Units are sold before the end of the Investment Period: the price will not be calculated using the formula but will be based on the Net Asset Value of the UCITS, which will include the market value of the financial derivative contracts used.

Risk and Reward Profile

What do these numbers mean? They rate how the Fund may perform and the risk of losing part of your capital. Generally the potential for higher gains also means a larger risk of losses. The lowest category does not mean a risk free investment.

Historical data, such as ones used for calculating this indicator, may not be a reliable indication of the future risk profile of this Fund.

The risk and reward category for this Fund is not guaranteed to remain unchanged, and may shift over time.

This indicator solely describes the risk and reward characteristics of the Derivative Investment Strategy.

For additional details on risks, please refer to the prospectus.

Why is this Fund in category 2? The Fund is classified in the specific category because its share price may have small/negligible fluctuations comparative to higher categories classifications. The likelihood of bigger losses or gains is small.

The Risk/Reward profile is a reasonably accurate reflection of the risk inherent in the Fund under past market & operational conditions. As regards potential future extraordinary events different from those occurred in the past history of the Fund, these are not captured by the Risk/Reward profile. Other risks not captured by it include:

- the risk due to operational failure, i.e. human error or failure in systems and processes,
- the risk due to unforeseeable unusually big orders by clients to exit the Fund, which may result in worse than expected entry/exit price levels,
- the risk that the Derivative Investment Strategy counterparty is not able to meet their obligations under the signed executed agreement (this risk is reduced by receiving collateral amount by the counterparties on a regular basis),
- in cases that the Fund invests in derivatives, mainly the risk of failure of derivative counterparties to fulfill their obligations,
- the default risk, that an issuer of a debt security held by the Fund in its investment portfolio may fail to fulfill his obligations to pay revenue and repay initial investment amount.

Charges

Investments in this Fund are subject to the following charges:

One - off charges taken before or after you invest

Entry Charge	4.00%
Exit Charge	2.00%

Charges taken from the Fund over each year

Ongoing Charges	1.79%
-----------------	-------

Charges taken from the Fund under certain conditions

Performance Fee	None
-----------------	------

The entry and exit charges shown are maximum figures and in some cases you may pay less. You can find out the actual charges from your financial advisor or distributor.

Ongoing charges are an estimation of the annual expenses of the Fund based on the last available data as of the publication date of this document. This figure may vary from year to year.

The charges you pay are used to pay the costs of running this Fund, including the costs of marketing and distributing the Fund. These charges reduce the potential growth of the investment.

Investors may switch between other Funds of the Umbrella Fund. Switch charges may be applied in certain cases.

For more information on all charges, please refer to the section FUND CHARGES AND EXPENSES of the prospectus which can be found at websites www.eurobankfmc.lu.
