

KEY INVESTOR INFORMATION

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

(LF) Special Purpose – Equity Formula Index II fund, a sub-fund of (LF) Fund

Eurobank Class, ISIN LU1955041998: Currency: EUR

This Fund is managed by Eurobank Fund Management Company (Luxembourg) S.A., part of the Eurobank Group

Objectives and Investment Policy

The sub-fund (the “Fund”) aims mainly to provide capital growth in line with a systematic strategy on a selected equity indices as described below (the “Derivative Investment Strategy”), bank deposits, money market instruments and an actively managed portfolio of transferable debt securities, including fixed and variable interest rate securities and government bonds admitted to an Official Listing or dealt in on a Regulated Market, traded worldwide. The Funds performance is composed of two aspects:

- The Derivative Investment Strategy as further explained below, and
- The portfolio (the “Investment Portfolio”) composed of Greek Government debt securities, bank deposits, money market instruments, other European government debt securities, corporate debt securities, mortgage-backed securities and asset-backed securities, whereby the Fund may not invest more than 20% of its assets in mortgage-backed securities and asset-backed securities and may invest more than 35% of its assets in Greek Government bonds.

The Derivative Investment Strategy commences on March 26, 2019 and matures on March 26, 2029 (the “Investment Period”).

The Derivative Investment Strategy’s performance at the end of the Investment Period is based on a performance valuation mechanism according to points a), b), c), and d) below:

- The Equity Indices: EURO STOXX 50 (Bloomberg ticker: SX5E Index) (“Index A”), S&P 500 (Bloomberg ticker: SPX Index) (“Index B”) and NIKKEI 225 (Bloomberg ticker: NKY) (“Index C”) are selected (together mentioned as the “Indices”).
- March 26, 2019 is defined as the “Derivative Investment Strategy Initial Observation Date”, March 26, 2029 is defined as “Derivative Investment Strategy Final Observation Date”, and April 11th, 2029 is defined as “Derivative Investment Strategy Termination Date”.
- If for at least one Index from Indices A, B and C its closing level on the Final Observation Date is lower than its closing level on Initial Observation Date, then on the Derivative Strategy Termination Date the Fund gains an amount equal to 6.75% on the Derivative’s Strategy outstanding notional amount on that date.
- Otherwise, i.e. if for all Indices A,B and C their closing levels on Final Observation Date are equal to or greater than their corresponding closing levels on Initial Observation Date, then on the Derivative Strategy Termination Date the Fund gains 26.5% on the Derivative’s Strategy outstanding notional on that date.

The investors are informed that the payout for the investors is not only depending on the performance of the Derivative Investment Strategy (as shown above), but also depends on the performance of the Investment Portfolio. Therefore, the investors’ return may end up being lower than indicated under points c) and d) or even turn negative in case where the Investment Portfolio has materially underperformed.

Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money before the end of the Investment Period. For full investment objectives and policy details please refer to the prospectus.

Illustrative Examples

The following scenarios are examples and are purely indicative, in order to illustrate the formula’s mechanism under different market conditions. They reflect the output of the Fund at maturity only and are based on assumptions on the performance of the formula’s underlying Indices as well as on the performance of the Investment Portfolio. They do not represent a forecast of what might happen and may not have an equal probability of occurrence. They do not account for risks described in the “Risk and Reward Profile” section, which may lead to higher level of loss for the investor.

Unfavourable conditions

Underlying performance (*)	UCITS performance at maturity	Equivalent annual growth rate
At least one Index closes below Initial level	+6,75%	+0.66%

Favourable conditions

Underlying performance (*)	UCITS performance at maturity	Equivalent annual growth rate
All Indices close at equal or higher level	+26.50%	+2.38%

Very unfavourable conditions

Underlying performance (*)	UCITS performance at maturity	Equivalent annual growth rate
At least one Index closes below Initial level. Additionally UCITS experiences losses from the Investment Portfolio.	-40.00%	-4.98%

(*) At the end of the Investment Period, at least one Index closes below initial level and there is no contribution from the Investment Portfolio, so the Derivative Investment Strategy return is +6.75%. That is the “floor” that protects the investor from underperformance of the Indices. This corresponds to +0.66% annual growth. Furthermore we assume that there is no additional contribution to the performance of the Fund from the Investment Portfolio other than covering the expenses of the Fund. Thus the total return of the Fund is +6.75% which corresponds to +0.66% annual growth.

(*) At the end of the Investment Period all Indices close at equal or higher level and there is no contribution from the Investment Portfolio, so the Derivative Investment Strategy return is +26.50%. Furthermore we assume that there is no additional contribution to the performance of the Fund from the Investment Portfolio other than covering the expenses of the Fund. The investor gains the maximum return of the Derivative Investment Strategy . This corresponds to +2.38% annual growth.

(*) At the end of the Investment Period, at least one Index closes below initial level, so the Derivative Investment Strategy return is +6.75% but **there is a negative contribution from the Investment Portfolio, due to the scenario of hypothetical losses from certain issuers** in the portfolio (as described in the "Risk and Reward Profile" section). The total result for the Funds performance is - 40.00%. This corresponds to -4.98% negative annual growth.

If Units are sold before the end of the Investment Period: the price will not be calculated using the formula but will be based on the Net Asset Value of the UCITS, which will include the market value of the financial derivative contracts used.

Risk and Reward Profile

What do these numbers mean? They rate how the Fund may perform and the risk of losing part of your capital. Generally the potential for higher gains also means a larger risk of losses. The lowest category does not mean a risk free investment.

Historical data, such as ones used for calculating this indicator, may not be a reliable indication of the future risk profile of this Fund. The risk and reward category for this Fund is not guaranteed to remain unchanged, and may shift over time.

For additional details on risks, please refer to the prospectus.

Why is this Fund in category 7? The Fund is classified in the specific category because its Unit price may fluctuate significantly comparative to lower categories classifications. Therefore the likelihood of bigger losses or gains is comparatively high.

The Risk/Reward profile is a reasonably accurate reflection of the risk inherent in the Fund under past market & operational conditions. As regards potential future extraordinary events different from those occurred in the past history of the Fund, these are not captured by the Risk/Reward profile. Other risks not captured by it include:

- the risk due to operational failure, i.e. human error or failure in systems and processes,
- the risk due to unforeseeable unusually big orders by clients to exit the Fund, which may result in worse than expected entry/exit price levels,
- the risk that the Derivative Investment Strategy counterparty/ies is not able to meet their obligations under the signed executed agreement (this risk is reduced by receiving collateral amount by the counterparties on a regular basis),
- in cases that the Fund invests in derivatives, mainly the risk of failure of derivative counterparties to fulfill their obligations,
- the default risk, that an issuer of a debt security held by the Fund in its Investment Portfolio may fail to fulfill his obligations to pay revenue and repay initial investment amount.

Charges

Investments in this Fund are subject to the following charges:

One - off charges taken before or after you invest	
Entry Charge	4.00%
Exit Charge	2.00%
Charges taken from the Fund over each year	
Ongoing Charges	1.50%
Charges taken from the Fund under certain conditions	
Performance Fee	None

The entry and exit charges shown are maximum figures and in some cases you may pay less. You can find out the actual charges from your financial advisor or distributor.

Ongoing charges are an estimation of the annual expenses of the Fund based on the last available data as of the publication date of this document. This figure may vary from year to year.

The charges you pay are used to pay the costs of running this Fund, including the costs of marketing and distributing the Fund. These charges reduce the potential growth of the investment.

Investors may switch between other Funds of the Umbrella Fund. Switch charges may be applied in certain cases.

For more information on all charges, please refer to the section FUND CHARGES AND EXPENSES of the prospectus which can be found at websites www.eurobankfmc.lu.

Past Performance

This chart has been left intentionally blank since it is a newly launched share class and there is no performance.

The class was launched on 18.02.2019
