Investment Objective

The Sub-Fund aims to achieve total return through income and capital appreciation, while seeking to preserve the invested capital of the Unitholders, who will maintain their holdings over the predetermined investment horizon of five (5) years. The Sub-Fund will be fully liquidated by November 1, 2030. To achieve its objective, the Sub-Fund invests primarily in a diversified portfolio of corporate and government bonds. Investments made by the Sub-Fund will take into account the Maturity Date. It will follow an approach of holding the bonds invested at the inception of the Fund until their maturity (buy and hold). Any debt securities, bonds, fixed income notes maturing in the (six)6 months prior to the Maturity Date may be invested in money market instruments or readily realizable assets in order to safeguard the interests of unitholders until the Maturity Date.

The Eurobank DIS Series Shares distribute dividends as set out in Article 9 “Dividend Distribution Policy” of the Prospectus. (*) The dividend will be paid annually on the week of the anniversary of the start date of the investment strategy. It is intended annual dividend distribution between a range of 1,90% – 2,30% for each of the next 5 years. The above dividend estimate is based on current conditions and maybe adjusted during the holding period depending on market conditions.

(*) Provided that there are no negative developments in the bond market such as a credit event with default by issuers of bonds and portfolio securities

Investor Profile

The Sub-Fund is intended for investors who seek regular income and capital gains, who are willing to accept the risks associated with their investment and who are willing to maintain their holding until the Maturity Date.

Portfolio Strategy

The sub-fund has completed its investment process in accordance with its mandate and the limitations set out in the prospectus. Its portfolio is well diversified and consists primarily of investment-grade corporate notes, with a focus on the financial sector. Additionally, the portfolio includes a smaller allocation to government bonds.

Risk Indicator (in yellow)

The risk indicator assumes you keep the investment for 5 years

* Risk indicator refers to Eurobank DIS Share Class.

The risk indicator provides guidance on the level of risk associated with this product compared to others. It highlights the likelihood of the product incurring a financial loss. A lower value of the Risk Indicator suggest more stable, less volatile investments.

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

Not all risks affecting the Sub-Fund are adequately captured by the summary risk indicator. This rating does not take into account other risk factors which should be considered before investing, these includes: credit risk and counterparty risk.

Please refer the "Risk factors" section of the prospectus of the Fund.

Risk Statistics

Standard Deviation: 0,88%

Standard deviation has been calculated using a data sample from the past 12 months. The VaR analysis employs the Historical Simulation method, using the 99th percentile as the confidence interval and historical data from the same 12-month period. The reported VaR level corresponds to a one-month VaR.

Complementary Information

The Sub-Fund is classified under Article 6 of Regulation (EU) 2019/2088 (SFDR). It does not promote environmental or social characteristics and does not have sustainable investment as its objective.

This material is provided for informational purposes only and does not constitute investment advice, an offer to purchase, or a solicitation to sell the product. Potential investors are advised to thoroughly review the latest prospectus and Key Information Document (KID) and consult the most recent financial reports before subscribing to this financial instrument, in particular the risk, costs and ESG sections. These documents are available in both Greek and English in the Mutual Funds section of the websites www.eurobankfmc.lu, www.eurobankam.gr, www.eurobank.gr

In accordance with the conditions laid down in the Article 93a of Directive 2009/65/EC, the management company Eurobank FMC-LUX may decide to terminate the arrangements made for the marketing of its collective investment undertakings in a EU Member State.

A summary of investor rights is available at the chapter 15 of the prospectus (Unitholders Information) accessible in the Legal section of the website www.eurobankfmc.lu.

Glossary

Standard deviation: is the standard statistical measure for total volatility (risk). It measures how much returns fluctuate from the average over a certain period. Comparing different funds Products, higher Standard Deviation means the investment is riskier, as returns may vary significantly from the expected average.

Value at Risk percentage (VaR %): quantifies the maximum expected loss of a portfolio over a specified time period at a defined level of statistical confidence. For example, a monthly 99% VaR of 2% means that there is a 99% probability that the fund will not lose more than 2% of its value in any given month. (The 1% represents the chance that the loss will exceed 2%.)

Yield To Maturity (YTM): Represents the total return an investor can expect to earn if a bond is purchased at its current market price and held until maturity. It is the internal rate of return (IRR) that equates a bond's future cash flows to its current market price.

Duration: Is a measure of a bond's sensitivity to changes in interest rates. It represents the weighted average time, in years, required to receive the bond's cash flows. The higher the duration, the more sensitive the bond is to interest rate fluctuations.

Buy and hold strategy: means the fund mainly buys bonds and keeps them until they mature, rather than trading them frequently. The fund is designed for investors who are willing to stay invested for the full investment period.
