Date of Production of the Key Information Document: 09/02/2024

What is this product?

Type: (LF) is a mutual investment fund (“fonds commun de placement”) organized under Part I of the Luxembourg law of 17 December 2010 on undertakings for collective investment.

Term: The Sub-Fund’s investment Strategy has been established for 2 years.

Objectives: The Sub-Fund that aims to provide investors with capital growth. In order to achieve the Sub-Fund’s objectives: 1) a portfolio of bank deposits, money market instruments, debt securities, mortgage-backed securities and asset-backed securities is chosen at discretion of the portfolio manager, 2) a Derivative Investment Strategy is put into action through financial derivative contracts. The current Investment Period of the Sub-Fund commences on May 6, 2015 and ends on April 29, 2025. The Board of Directors of the Sub-Fund will decide before the end of the Investment Period, whether the Sub-Fund will be liquidated, prolonged for a new term or contributed to another Sub-Fund. The Derivative Investment Strategy is linked to the performance of a basket composed of 20 equities. The performance is calculated over 10 pre-determined Calculation Periods. For the first Calculation Period, the performance of the two highest performing equities is recorded and locked, for the rest of the Investment Period, at a minimum of 0%. If their performance is higher than this, then it is recorded at that level. For each of the following Calculation Periods: 1) the basket of 20 equities is composed of locked equities from previous Calculation Periods (2 per each Calculation Period) and non-locked equities, 2) the performance of the two highest performing equities amongst the remaining nonlocked equities is recorded and locked for the rest of the Investment Period at a minimum of 0%. If their performance is higher than this, then it is recorded at that level. The Derivative Investment Strategy return at the end of the Investment Period equals the average of the locked performances of the equities in the basket at the last (10th) Calculation Period. The Sub-Fund’s overall return is linked to the portfolio return and the Derivative Investment Strategy return, as described above. This product does not have the objective of sustainable investment or binding environmental or social characteristics as defined by Regulation (EU) 2019/2088 on Sustainability-related Disclosures in the Financial Services Sector (the “SFDR”).

The Sub-Fund is actively managed which means that the investment manager is actively making investment decisions for the Sub-Fund. The Sub-Fund is not managed in reference to a benchmark. You can buy or sell shares of the Sub-Fund on a daily basis (bank business days in Luxembourg and Greece). All income of the Sub-Fund is reinvested. Recommendation: This Sub-Fund may not be appropriate for investors who plan to withdraw their money before the end of the Investment Period.

For full investment objectives and policy details please refer to the prospectus.

Depositary: Eurobank Private Bank Luxembourg S.A

Intended retail investor: Is addressed to investors with a medium-long horizon seeking professional management of their money with immediate liquidity and low costs, aiming for capital gains through their participation in a diversified portfolio appropriate to investment objective of the product, while at the same time they are familiar with the possible loss part of their capital.

What are the risks and what could I get in return?

The risk indicator assumes you keep the product for 1 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back.

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

The Product is classified in the specific category because its share price may fluctuate moderately comparative to higher or lower categories classifications. Therefore the likelihood of bigger losses or gains is comparatively moderate and poor market conditions are unlikely to impact the capacity of the Sub-Fund to pay you.

This product does not include any protection from future market performance so you could lose some or all of your investment.

The Risk / Reward profile is a reasonably accurate reflection of the risk inherent in the Fund under past market & operational conditions. As regards potential future extraordinary events during the Fund, these are not captured by the Risk / Reward profile; other risks not captured by it include: Liquidity risk. This is the risk that the Fund will not be able to pay redemption proceeds within the time period stated in the Prospectus, because of unusual market conditions, an unusually high volume of redemption requests, or other reasons. Valuation risk, the risk that arises from dysfunctional financial markets that might lead to unfair valuation of the fund. Operational risk, the risk of failure due to human error or a problem in systems or/and processes.

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future. The stress scenario shows what you might get back in extreme market circumstances.

Recommended Holding Period: 1 years

Investment: 10.000 EUR

Performance Scenario		If you surrender after 1 year
Minimum	There is no minimum guaranteed return.	
Stress Scenario	What you might get back after costs	8,640 €
	Average Return each year	-13,55%
Unfavourable Scenario	What you might get back after costs	9,610 €
	Average Return each year	-3,88%
Moderate Scenario	What you might get back after costs	9,980 €
	Average Return each year	-0,19%
Favourable Scenario	What you might get back after costs	10,350 €
	Average Return each year	3,50%

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What happens if Eurobank Fund Management Company (Luxembourg) S.A. is unable to payout?

The assets of the UCITS are kept by its Depositary, "Eurobank S.A.". In case of insolvency of the Management Company, the assets of the UCITS, the safekeeping of which has been assigned to the custodian, will not be affected.

What are the costs?

The person who provides you with investment advice on this product or sells it to you in the context of providing investment services may charge you other costs. If this happens, they will give you information about this cost and how it affects your investment

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- 10.000 EUR is invested

	If you surrender after 1 year
Total Costs	246 €
Annual cost impact (*)	2,5%

(*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at maturity your average return per year is projected to be 1,73% before costs and -0,21% after costs

Composition of Costs

One-off costs upon entry or exit		If you surrender after 1 year
Entry Costs	0,00% of the amount you pay in when entering this investment.	0 EUR
Exit Costs	2,00% of your investment before it is paid out to you.	200 EUR
Ongoing costs taken each year		
Management fees and other administrative or operating costs	0,21% of the value of your investment per year. This is an estimate based on actual costs over the last year.	21 EUR
Transaction Costs	0,26% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	26 EUR
Incidental costs taken under specific conditions		
Performance fees	None	0 EUR

How long should I hold it and can I take money out early?

Recommended holding period: 1 years

This fund is appropriate for investors who plan to keep their investment for time horizon similar to the strategy of the fund. Shareholder will be able to sell at all times according to exit fees policy.
