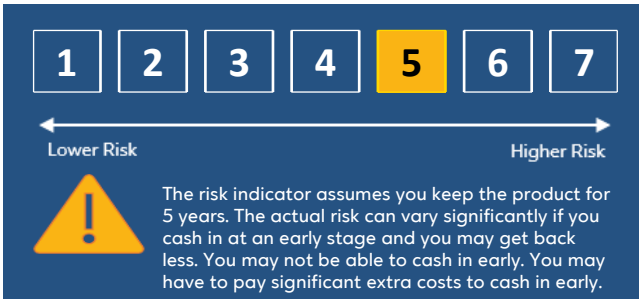
What is this product?
Type: This product is a class of units of the Sub-Fund and denominated in EUR. The Fund is a mutual investment fund ("fonds commun de placement") and qualifies as an Undertaking for Collective Investments in Transferable Securities ("UCITS"), organized under Part I of the Luxembourg law of 17 December 2010 on undertakings for collective investments ("Investment Fund Law"), transposing Directive 2009/65/EC related to UCITS.
Term: The Sub-Fund's investment Strategy has been established for 6 years.
Objectives: The Sub-Fund aims mainly to provide capital growth in line with a systematic strategy on a selected equity indices as described below (the "Derivative Investment Strategy"), bank deposits, money market instruments and an actively managed portfolio of transferable debt securities, including fixed and variable interest rate securities and government bonds admitted to an Official Listing or dealt in on a Regulated Market, traded worldwide. The Sub-Funds performance is composed of two aspects: - The Derivative Investment Strategy as further explained below, and - The portfolio (the "Investment Portfolio") composed of Greek Government debt securities, bank deposits, money market instruments, other European government debt securities, corporate dept securities, mortgage-backed securities and asset-backed securities, whereby the Sub-Fund may not invest more than 20% of its assets in mortgage-backed securities and asset-backed securities and may invest more than 35% of its assets in Greek Government bonds. The Derivative Investment Strategy commences on June 18, 2019 and matures on June 19, 2029 (the "Investment Period"). The Derivative Investment Strategy's performance at the end of the Investment Period is based on a performance valuation mechanism according to points a), b), c), and d) below: a) The Equity Indices: EURO STOXX 50 (Bloomberg ticker: SX5E Index) ("Index A "), S&P 500 (Bloomberg ticker: SPX Index) ("Index B") and NIKKEI 225 (Bloomberg ticker: NKY) ("Index C") are selected (together mentioned as the "Indices"). b) June 18, 2019 is defined as the "Derivative Investment Strategy Initial Observation Date", June 19, 2029 is defined as "Derivative Investment Strategy Final Observation Date", and June 26, 2029 is defined as "Derivative Investment Strategy Termination Date". c) If for at least one Index from Indices A, B and C its closing level on the Final Observation Date is lower than its closing level on Initial Observation Date, then on the Derivative Strategy Termination Date the Sub-Fund gains an amount equal to 6.75% on the Derivative's Strategy outstanding notional amount on that date. d) Otherwise, i.e. if for all Indices A, B and C their closing levels on Final Observation Date are equal to or greater than their corresponding closing levels on Initial Observation Date, then on the Derivative Strategy Termination Date the Sub-Fund gains 26.5% on the Derivative's Strategy outstanding notional on that date. The investors are informed that the payout for the investors is not only depending on the performance of the Derivative Investment Strategy (as shown above), but also depends on the performance of the Investment Portfolio. Therefore, the investors' return may end up being lower than indicated under points c) and d) or even turn negative in case where the Investment Portfolio has materially underperformed.This product does not have the objective of sustainable investment or binding environmental or social characteristics as defined by Regulation (EU) 2019/2088 on Sustainability-related Disclosures in the Financial Services Sector (the "SFDR").
The Sub-Fund is actively managed which means that the investment manager is actively making investment decisions for the Sub-Fund. The Sub-Fund is not managed in reference to a benchmark. Recommendation: This Sub-Fund may not be appropriate for investors who plan to withdraw their money before the end of the Investment Period.
For full investment objectives and policy details please refer to the prospectus.
Depositary: Eurobank Private Bank Luxembourg S.A, 534, Rue de Neudorf, L-2220 Luxembourg.
Intended retail investor: Is addressed to investors with a medium-long horizon seeking professional management of their money with immediate liquidity and low costs, aiming for capital gains through their participation in a diversified portfolio appropriate to investment objective of the product, while at the same time they are familiar with the possible loss part of their capital.

What are the risks and what could I get in return?



Risk Indicator
The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.
The Product is classified in the specific category because its share price may fluctuate moderately comparative to higher or lower categories classifications. Therefore the likelihood of bigger losses or gains is comparatively moderate and poor market conditions are unlikely to impact the capacity of the Sub-Fund to pay you.
This product does not include any protection from future market performance so you could lose some or all of your investment.

Not all risks affecting the Sub-Fund are adequately captured by the summary risk indicator.
This rating does not take into account other risk factors which should be considered before investing, these includes: Credit risk involves the risk that an issuer of a bond or similar money-market instruments or OTC derivative held by the Fund may default on its obligations to pay revenue and repay principal and the Fund will not recover its investment. Counterparty risk is the probability that the other party in an investment, credit, or trading transaction may not fulfill its part of the deal and may default on the contractual obligations. Interest rate risk is the risk that the value of an investment will change due to changes in the level of interest rates. The risk associated with the use of financial derivative, is related with the leverage structure of such products.Liquidity risk. This is the risk that the Fund will not be able to pay redemption proceeds within the time period stated in the Prospectus, because of unusual market conditions, an unusually high volume of redemption requests, or other reasons.Please refer the "Risk factors" section of the prospectus of the Fund
