What is this product?

Type: This product is a class of units of the Sub-Fund and denominated in EUR. The Fund is a mutual investment fund ("fonds commun de placement") and qualifies as an Undertaking for Collective Investments in Transferable Securities ("UCITS"), organized under Part I of the Luxembourg law of 17 December 2010 on undertakings for collective investments ("Investment Fund Law"), transposing Directive 2009/65/EC related to UCITS.
Term: The Sub-Fund has been established for an unlimited period of time and is terminated in case any of the conditions referred to in article 2 of the Fund's Prospectus.
Objectives: The Sub-Fund will seek to achieve its capital appreciation objective by investing in a diversified multi-asset portfolio composed of: 1)A basket of UCITS exposed to the following asset classes (the "Asset Classes"): equities (maximum 80%), fixed income securities (maximum 30%) and high yield credit (maximum 25%) (the "Dynamic Portfolio"); 2) Cash deposits and a basket of UCITS which invest in to money market instruments (the "Protection Portfolio"). The Sub-Fund will adopt a strategy that rebalances the investment allocation between the "Dynamic" and "Protection" portfolios, according to the TIPP ("Time Invariant Portfolio Protection") methodology which aims at limiting the maximum decrease in value of the Sub-Fund so that it does not exceed 20%. The TIPP methodology dictates the maximum allowed allocation of the Sub-Fund's assets to the Dynamic Portfolio on each Business Day. Assets not allocated to the Dynamic Portfolio are invested in the Protection Portfolio. Under the circumstances that the Dynamic Portfolio experiences a substantial drawdown, the proportion allocated to the Dynamic Portfolio as per the TIPP methodology could potentially become zero and consequently the entire assets of the Sub-Fund will be invested in the Protection Portfolio. Such event is called a "Cash-Lock Event" and when this happens in a negative money-market environment, the Sub-Fund can no longer invest in the Dynamic Portfolio and benefit from a market recovery. In order to mitigate the Cash-Lock risk, the Sub-Fund can temporarily lower the allocation to the Dynamic Portfolio below the maximum allowed by the TIPP methodology or even temporarily zero the allocation to the Dynamic Portfolio, based on equity market volatility indicators. The Sub-Fund is actively managed and does not follow any benchmark. Barclays Bank PLC, has been selected as "Allocation Agent" to provide operational support to the Guarantor and Investment Manager in relation to the implementation of the TIPP methodology. Barclays Bank Ireland was selected as Guarantor. The Sub-Fund will on each Business Day offer an element of protection equal to at least 80% of the highest Net Asset Value per Unit ever achieved by the Sub-Fund from its launch onwards (i.e. commencing with the price per Unit set at the day of the initial offering) ("Protected Level"). This protection will be achieved through: 1) the OTC Put Option that aims to pay any shortfall amount that the Sub-Fund may need to receive in order to pay the Protected Level to the unitholders in case of redemption from the Sub-Fund. If the Sub-Fund's Net Asset Value per unit equals or exceeds the Protected Level, the Sub-Fund will not exercise the OTC Put Option. The Sub-Fund bears OTC Put Option related costs. 2) a guarantee contract (the "Guarantee") with the Guarantor under which the Guarantor will pay an amount equal to the Protected Level less the Net Asset Value per unit of the Sub-Fund (if positive). For the avoidance of doubt, the Sub-Fund's capital appreciation objective is not guaranteed. Sub-Fund has no any predetermined expiration date. Net Asset Value per Unit coincides with the daily subscription/ redemption price per Unit. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.
This product does not have the objective of sustainable investment or binding environmental or social characteristics as defined by Regulation (EU) 2019/2088 on Sustainability-related Disclosures in the Financial Services Sector (the "SFDR"). The Sub-Fund is actively managed which means that the investment manager is actively making investment decisions for the Sub-Fund. The Sub-Fund is not managed in reference to a benchmark.You can buy or sell shares of the Fund on a daily basis (bank business days in Luxembourg, UK and Greece).
For full investment objectives and policy details please refer to the prospectus.
Depositary: Eurobank Private Bank Luxembourg S.A, 534, Rue de Neudorf, L-2220 Luxembourg.
Intended retail investor: Is addressed to investors with a medium-long horizon seeking professional management of their money with immediate liquidity and low costs, aiming for capital gains through their participation in a diversified portfolio appropriate to investment objective of the product, while at the same time they are familiar with the possible loss part of their capital.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.
The Product is classified in the specific category because its share price may have small/negligible fluctuations comparative to higher categories classifications. The likelihood of bigger losses or gains is small and poor market conditions are unlikely to impact the capacity of the Sub-Fund to pay you.
This product does not include any protection from future market performance so you could lose some or all of your investment.

Not all risks affecting the Sub-Fund are adequately captured by the summary risk indicator.
This rating does not take into account other risk factors which should be considered before investing, these includes: Credit risk involves the risk that an issuer of a bond or similar money-market instruments or OTC derivative held by the Fund may default on its obligations to pay revenue and repay principal and the Fund will not recover its investment. Counterparty risk is the probability that the other party in an investment, credit, or trading transaction may not fulfill its part of the deal and may default on the contractual obligations. Interest rate risk is the risk that the value of an investment will change due to changes in the level of interest rates. The risk associated with the use of financial derivative, is related with the leverage structure of such products.Please refer the "Risk factors" section of the prospectus of the Fund
