What is this product?

Type: This product is a class of units of the Sub-Fund and denominated in EUR. The Fund is a mutual investment fund ("fonds commun de placement") and qualifies as an Undertaking for Collective Investments in Transferable Securities ("UCITS"), organized under Part I of the Luxembourg law of 17 December 2010 on undertakings for collective investments ("Investment Fund Law"), transposing Directive 2009/65/EC related to UCITS.

Term: The Sub-Fund will mature on 31 March 2031 (the "Maturity Date"). The Sub-Fund will be fully invested on the Maturity Date. The Board of Directors will decide before Sub-Fund's Maturity Date, whether the Sub-Fund will be contributed to another Sub-Fund of the (LF) or (LF) Fund of Funds fonds commun de placement, or its investment objective and policy will be amended. Unitholders will be informed accordingly in due course after the maturity date of the Sub Fund's investment strategy, and they will be offered a one-month period during which they will have the possibility to redeem their Units free of charge before such changes become effective. The Sub-Fund is terminated in case any of the conditions referred to in article 2 of the Fund's Prospectus.

Objectives: The Sub-Fund aims to provide capital growth by investing its assets in fixed income transferable securities denominated in Euro, such as government and corporate bonds while gaining progressively equity exposure by investing in units of UCITS and/or UCITS compliant ETFs.

The Sub-Fund may invest in units of UCITS which primarily invest in equities that are expected to benefit from developments in major global trends and themes.

The Sub-Fund may invest more than 35% of its net assets in any one of the European Union members government bonds and may also invest up to 20% of its net assets in debt securities carrying corporate risk admitted to an Official Listing or dealt in on a Regulated Market, traded worldwide. The Sub-Fund may be exposed up to 50% to debt securities whose rating is below investments grade. The Sub-Fund will not invest in distressed or defaulted securities. Should a security be downgraded to distressed or default, the Sub-Fund will sell them, unless the valuation about the recovery rate justifies otherwise, in which case the Sub-Fund will hold these securities in portfolio. Securities downgraded to distressed of default and kept in portfolio will not exceed 10% of the net assets of the Sub-Fund. In the first year of the investment strategy, the Sub-Fund will have exposure in debt securities and may maintain equity exposure up to 10% of its net assets. In the second and third year of the Sub-Fund's investment cycle, a progressive increase of the equity exposure is expected on a quarterly basis until it reaches at least 50% of the total net assets at the end of the third year. In the event of a significant decline in the equity market during the second and third year of the Sub-Fund's investment cycle, the equity exposure may be increased faster and reach 50% of the total assets before the end of the third year. After the third year of the investment cycle the equity exposure itself may vary between 35% and 65% of the total net assets. Secondly, the Sub-Fund invests in bank deposits, money market instruments and units of money market funds compliant with regulation (EU) 2017/1131. Liquidities may be used within the limits described in sections 3.1 and 4 of the Prospectus. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities. The Sub-Fund does not promote environmental or social characteristics in a way that meets the specific criteria contained in Article 8 of the Sustainable Financial Disclosure Regulation ("SFDR") or have sustainable investment as its objective in a way that meets the specific criteria contained in Article 9 of SFDR. The Sub-Fund is actively managed which means that the investment manager is actively making investment decisions for the Sub-Fund. The Sub-Fund is not managed in reference to a benchmark. Given the above investment objective and policy and the risk and reward profile of the product, the recommended holding period is 5 years.

All income of the Sub-Fund is reinvested. You can buy and sell shares of the Fund on a daily (bank business days in Luxembourg and Greece) basis. You can subscribe units of the Sub-Fund from 3rd of November 2025 until the expiration of the initial offering period on March 31, 2026. After the expiration of the initial offering period, the Sub-Fund will be closed to all subscriptions and conversions.

For full investment objectives and policy details please refer to the prospectus.

Depository: Eurobank Private Bank Luxembourg S.A, 534, Rue de Neudorf, L-2220 Luxembourg.

Intended retail investor: The Sub-Fund has a medium risk profile and is addressed to investors who seek to achieve capital gains through investing mainly in bonds while also gaining progressively exposure to equity market, who are willing to accept the risks associated with their investment, and who are prepared to remain invested until the Maturity Date.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

The Product is classified in the specific category because its share price may fluctuate little comparative to higher categories classifications, but more comparative to lower ones. The likelihood of bigger losses or gains is comparatively small and poor market conditions are unlikely to impact the capacity of the Sub-Fund to pay you.

This product does not include any protection from future market performance so you could lose some or all of your investment.

"Not all risks affecting the Sub-Fund are adequately captured by the summary risk indicator.

This rating does not take into account other risk factors which should be considered before investing, these includes: credit risk, liquidity risk and investing in High Yield Bonds risk. Please refer the "Risk factors" section of the prospectus of the Fund."

What happens if Eurobank Fund Management Company (Luxembourg) S.A. is unable to payout?

The assets of the Fund constitute independent assets, distinct in all respects from the assets of the Management Company. The assets are kept by its Depositary, "Eurobank Private Bank Luxembourg S.A.". In case of insolvency of the Management Company, the assets of the UCITS, the safekeeping of which has been assigned to the custodian, will not be affected. There is no compensation or guarantee scheme in place which may offset all or any such loss.

What are the costs?

The person who provides you with investment advice on this product or sells it to you in the context of providing investment services may charge you other costs. If this happens, they will give you information about this cost and how it affects your investment

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
