**What is this product?**

**Type:** (LF) Fund of Funds is a mutual investment fund ("fonds commun de placement") organized under Part I of the Luxembourg law of 17 December 2010 on undertakings for collective investment.

**Term:** The Fund and each of the Sub-Funds have been established for an unlimited period of time.

**Objectives:** This Sub-Fund aims to achieve medium / long term capital growth by providing a moderate, balanced investment exposure to various asset classes including equities, bonds, property, commodities and cash. The Sub-Fund invests mainly in funds (UCITS and/or other UCIs, ETFs) which mainly invest in a) equity securities and derivatives, b) transferable debt securities and derivatives c) commodities through eligible instruments and derivatives and d) bank deposits and/or money market instruments. Selection of the underlying funds is based on a quantitative and qualitative analysis on a frequent ongoing basis in order to contribute positively in the funds' objective. The Sub-Fund may and will at times invest (up to 50% of its net assets) directly in bank deposits and money market instruments. The Sub-Fund may use financial derivatives, for hedging purposes, to reduce the impact of market movements, credit risks, currency fluctuations and interest rate risks. The Sub-Fund is actively managed which means that the investment manager is actively making investment decisions for the Sub-Fund. The latter is not managed in reference to a benchmark. You can buy or sell shares of the Sub-Fund on a daily (bank business days in Luxembourg and Greece) basis.

**For full investment objectives and policy details please refer to the prospectus.**

**Depository:** Eurobank Private Bank Luxembourg S.A

**Intended retail investor:** Is addressed to investors with a medium-long horizon seeking professional management of their money with immediate liquidity and low costs, aiming for capital gains through their participation in a diversified portfolio appropriate to investment objective of the product, while at the same time they are familiar with the possible loss part of their capital.

**What are the risks and what could I get in return?**

**Risk Indicator**

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

The Fund is classified in the specific category because its share price may fluctuate little comparative to higher categories classifications, but more comparative to lower ones. The likelihood of bigger losses or gains is comparatively small.

This product does not include any protection from future market performance so you could lose some or all of your investment.

**Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.**

The Risk / Reward profile is a reasonably accurate reflection of the risk inherent in the Fund under past market & operational conditions. As regards potential future extraordinary events during the Fund, these are not captured by the Risk / Reward profile; other risks not captured by it include: Liquidity risk. This is the risk that the Fund will not be able to pay redemption proceeds within the time period stated in the Prospectus, because of unusual market conditions, an unusually high volume of redemption requests, or other reasons. Valuation risk, the risk that arises from dysfunctional financial markets that might lead to unfair valuation of the fund. Operational risk, the risk of failure due to human error or a problem in systems or/and processes.

## Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

## What are the costs?

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- 10.000 EUR is invested

	If you surrender after 1 year	If you surrender after 5 years (Recommended Holding Period)
Total Costs	136 €	701 €
Annual cost impact (*)	1,4%	1,4%

(\*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at maturity your average return per year is projected to be 4,33% before costs and 2,96% after costs
